

Vic Gundotra
President & CEO of AliveCor
Joined AliveCor November 2015.

Prior to joining AliveCor Vic served as Senior Vice President at Google from 2011 until April 2014, heading up the company's social initiatives. He joined Google in 2007 as vice president of engineering, where he was responsible for mobile application development, including product management and marketing. Prior to Google, Vic spent 15 years at Microsoft, where he worked on a variety of products and operating systems. He was recognized by MIT as a "Young Innovator under 35" for his work in sparking Microsoft's change from Win32 to the .NET programming model. While at Microsoft Vic also served as general manager of Microsoft's developer outreach efforts worldwide, including evangelism and strategy for products like Windows Vista, Visual Studio, Microsoft Office, Microsoft CRM and Windows Mobile.
